* Support Modeler	- 2009 (10.0), 2008 (9.0), 8.0 and 8.0.1, 7.2

Optional Products

- Not Used with Product

Notes

- * Compatibility 2008
 - * SPEL SP3 - if you need to run on earlier versions please contact SPEL support.
 - * SPLM is not fully functional when communicating across network devices that obscure the client's IP address, including (but not limited to) NAT routers or VPN solutions. Primary functionality like license return and scavenge may fail in these situations.
-

Revision History

9/17/2009	rizullo	Added note.
9/9/2009	ynma	Removed Vista as a supported OS for SPLM.
9/1/2009	rizullo	Updated and approved.
