

## To Review Fluid Codes

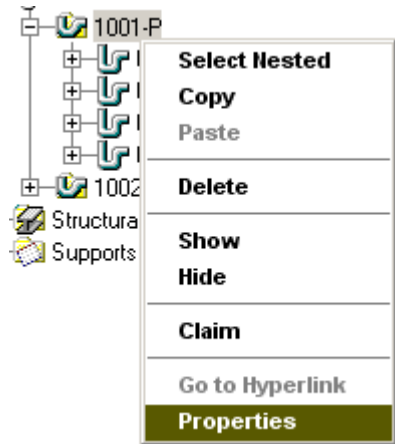

1. Bulkload new FC's
2. If SP3D is open, exit session and re-enter SP3D
3. Access SP3D Piping task

4. Set the Locate Filter to ALL

5. Right click on a Pipeline System  and select Properties

6. Click the Fluid Requirement field, select a desired fluid system from the drop down list

Sequence Number	1001
Fluid Requirement	Process
Fluid Type	Gas
Correlation Status	Solvent
Correlation Basis	Chemical
	Oil
	Process
	Relief
	Steam
	Steam Condensate

7. Click the Fluid Type field, select a desired fluid code from the pull down list

Sequence Number	1001
Fluid Requirement	Process
Fluid Type	PA, Process w/ rich/lean amine
Correlation Status	PA, Process w/ rich/lean amine
Correlation Basis	PAS, Process w/ severe amine
	PB, Process w/ benzene
	PH, Process w/ H2
	PHH, Process w/ H2 & H2S
	PHW, Process w/ aqueous H2S
	PL, Low temperature process
	PS, Process w/ S
	OK
	Car

8. Cancel the Pipeline properties form, unless you need to change the FC for this pipeline
